

- Stainless structure
- Easy operation
- Easy tool change

# F60

## BOX FORMING MACHINE

Arenco F60 is a compact and mechanically driven carton former that addresses those who want an affordable, modern and reliable machine with an operating speed of 20-60 strokes per minute.

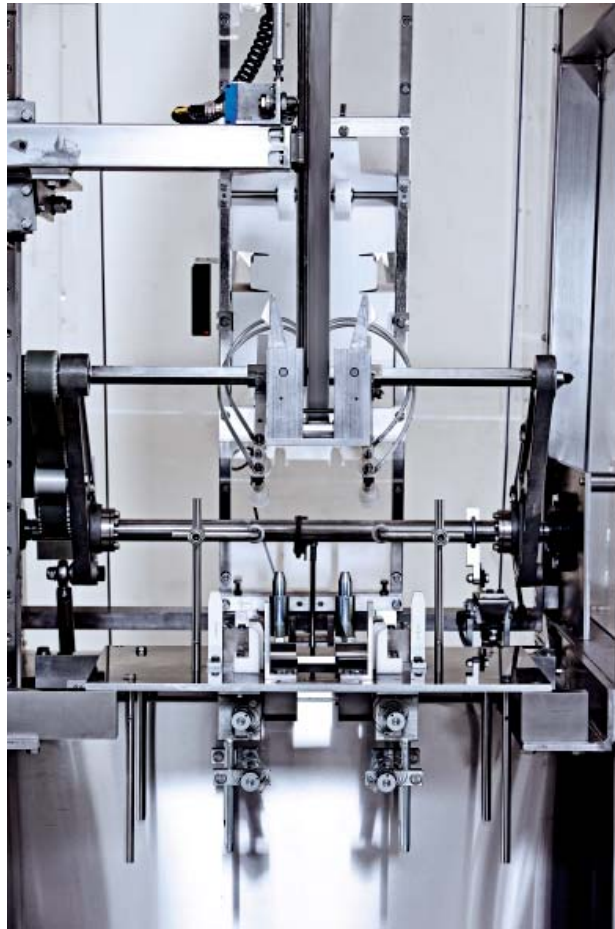

## F60

F60 is a mechanically operated box forming machine, designed to form boxes or trays at a speed up to 60 strokes per minute. The machine is also available in a double-head version, F60-2.

Depending on box size and quality the output is approx. 60 cartons per minute. Care has been taken regarding reliability, easy access for operators, maintenance and service. The F60 comes as a free-standing model. It is easy to adapt the machine to different conveyors and applications. The machine is made of stainless steel and meets the high demands in the food industry.

The F60 is designed for inter-changeable fixed tools and fixed magazines for mechanically interlocked cardboard/thin corrugated board.

Tool plate and plunger for tool type 301

### Operating speed

Variable speed from 20 up to 60 cartons/min

### Supply voltage

3x400V+N+PE, 50Hz  
(other supply standards available on request)

### IP classification

IP54

### Control voltage

24V DC

### Power consumption

2.5 kW

### Noise level

< 76 dB(A)

### Weight

455kg

### Machine size

Height: 2210mm  
Depth: 1135mm  
Width: 1032mm

### Safety standard

According to CE-directives (other standards on request)

### Optional equipment

Low level magazine indicator  
Control of blank feed

*Subject to technical changes without notice.*

### Box size (mm)\*

With standard tool. Other sizes on request.
